Global Life Sciences Compliance:
Achieving Operation Efficiencies in Regulatory and Labeling

A Joint Webinar Presented by i4i Inc. and Aris Global

Toronto, ON. August 30, 2009 – i4i Inc., a world leader in the design and development of collaborative content solutions for drug product label creation, management and submission, and Aris Global, a global provider of industry-leading software solutions for life sciences, will host a complimentary webinar that will address the compliance and efficiency challenges associated with end-to-end label management and registration tracking solutions.

Regulatory agencies across the globe continue to advance their requirements in how the pharmaceutical industry reports key information. XML documents such as PIM (Product Information Management) and SPL (Structured Product Labeling) are known means of increasing the efficiency of managing and exchanging critical product information.

Join Gilles Durot – Professional Services Director of i4i Inc. – and Mark Loudon – Director of Regulatory Compliance of Aris Global – as they discuss how a unique systems approach can address management and regulatory challenges across the globe, highlighting best practices on ensuring compliant and consistent labels.

Webcast Schedule and Details

Thursday Sept. 9 at 11:00 EDT / 15:00 UTC / 17:00 CEST
