## PRESS RELEASE

### Aris Global and i4i Announce Co-Marketing Agreement

*Stamford, CT-based Aris Global signs a co-marketing agreement with Toronto-based i4i.*

*Under the agreement,*

*Aris Global will market and sell **A4L** (ALiCE for Labeling), the complete global labeling solution for PIM and SPL compliant submissions*

**AT THE DIA CONFERENCE (Boston, MA) — June 23, 2008:** Aris Global, the leading provider of software solutions for life sciences, today announced that it has signed a co-marketing agreement with i4i, Inc., a world leader in the design and development of collaborative content solutions and technologies. **A4L** (ALiCE for Labeling), a comprehensive XML-based solution that addresses all authoring, lifecycle and submissions requirements of pharmaceutical product labeling, will be offered as an additional option through Aris Global's Register™ solution for end-to-end regulatory tracking and planning. Under the agreement, Aris Global will market and sell **A4L**, giving its customers a single, global platform for regulatory tracking and product labeling.

During the DIA 44<sup>th</sup> Annual Meeting, Aris Global will be presenting Register and A4L in its **booth #834 in the Boston Convention and Exhibition Center.**

Product labeling is now recognized as a fundamental component of regulatory compliance. The 2005 introduction of XML into the labeling process has evolved to where, in the US, the FDA now requires SPL (Structure Product Labeling) and, in the EU, the EMEA (European Agency for the Evaluation of Medicinal Products) accepts PIM (Product Information Management) – submissions comprised entirely of XML content. Both the SPL and PIM standards address the critical issue of inconsistency in labeling content.

**MORE**

With i4i's A4L solution, Aris Global's Register customers will benefit from a best-of-breed document authoring, collaboration and publishing platform to achieve control and compliance in product labeling management.

"i4i is one of the most well-respected leaders in XML-authoring and document management technologies," said Simon Sparkes, vice president, corporate strategy, Aris Global. "We are excited to associate our Register solution for regulatory tracking with i4i's state-of-the-art A4L product labeling solution. Both companies are focused on delivering best-of-breed solutions, and together, our two companies will help our customers achieve the full range of regulatory compliance."

According to Gilles Durot, i4i's senior product manager, Global Labeling, the adoption of XML standards in pharmaceutical regulatory is accelerating and giving rise to compelling opportunities to reduce risk by ensuring greater content consistency across a broad range of regulatory documents and submissions. "Working with Aris we expect to significantly improve efficiency and accuracy in the regulatory process."

### **About i4i**

Based in Toronto, Canada, i4i ([www.i4i.com](http://www.i4i.com)) is a world leader in the design and development of XML-based collaborative content solutions and technologies. The Company has a proven record of accomplishment and innovation having authored international standards and patented its technology. i4i has successfully developed and deployed collaborative content solutions to customers in industry and governments around the world.
