

***i4i Impact Statement on the Upton-Markey Amendment
(extended DST)***

November 20, 2006

The Upton-Markey Amendment passed July 2005 extends daylight savings time by four weeks in parts of the United States. i4i's editorial products; x4o and A4L-Professional, do not perform any date calculations thus there is no impact. i4i's Alice and A4L-Enterprise date/time stamp all transaction but does not rely on that stamp to organize transactions.
