

A4L Professional for SPL, XML PM, & FHIR ePI

Robust & Proven Microsoft Word Solution

A4L Professional is an industry-leading Microsoft Word-based solution with over two decades of success supporting the FDA's implementation of the SPL XML standard for pharmaceutical production information.

A4L has been extended to support XML PM (Health Canada) and FHIR ePI (Jordan FDA, EMA, ...) allowing users of all levels to easily manage the entire authoring and submission process as A4L works behind the scenes to create validated submissions.

Ease of Unstructured Word to XML Migration

Migration of existing content is fast and easy. Content can be authored directly in the templates or migrated from existing documents with **A4L's** unparalleled "Word to XML" function. Even the most complex tables and graphics are handled with ease.

Comprehensive Regulatory Support

A4L's guided templates for the management of the complete authoring, review, validation, and submission process, support all required templates in XML format.

A4L's comprehensive validation engine ensures the content is complete, consistent, and compliant, following Health Authority's guidance, validation procedures, and schema.

Streamlined Multi-language Support

Automated multi-language headings, standard text, and controlled vocabularies help align content authoring and metadata capture for compliant submissions in all official languages (EN, FR, AR,..).

Automated XML and FHIR Management

A4L takes all technical complexities out of the process, allowing authors to focus on the content while easily creating valid and compliant submissions.

Everything involving the management of the GUIDs (Globally Unique Identifiers), XML attributes, Ingredient Codes (UNIs), and coding associated with controlled vocabulary is automatically handled.

Supporting Our Clients

i4i's investment in R&D ensures that **A4L** keeps pace with changes in technology, standards, and regulatory requirements.

Our client & regulatory services team offers outstanding product support and regulatory guidance. Should you require additional resources the team is pleased to offer outsourced submission services.

When your needs extend to other jurisdictions or more complex labeling management processes **A4L Enterprise Edition** supports your CCDS and over 125 countries, managing content alignment, versioning, variants, translation, and change management.

Compliant Drug Product Metadata

A4L features user-friendly forms that guide the user through the creation of all required drug product information. The unique Health Authority resource updater ensures the extensive integrated lists of controlled vocabularies remain current.
